

# Child Development

Do you have an interest in working with children?  
 Does the development of children fascinate you?  
 Are you curious about how a foetus develops?  
 Does the nutritional and equipment needs of children intrigue you?

**If you answered yes to any of these questions then child development could be for you.**

The course consists of 2 controlled assessments and a final written examination. Each CA is worth 30% of the final mark awarded. The written examination is worth the remaining 40%.

## What will you do?

### Year 10

We will learn about...

- Reproduction
- Parental responsibility
- Antenatal care
- Birth
- Postnatal care
- Childhood illness
- Development

You will investigate the equipment and nutritional needs of children from birth to five years.

### Year 11

You will...

Research and investigate the development of a child between the age of 1-5 years. You will observe the child and record your findings to make clear conclusions.

**It is important that you have access to a child that is between the age of 1-4 years to enable to complete the study for your CA.**
